Yamaguchi University and Yamaguchi city

The roots of YU go back to 1815, with the founding of a school for the sons of local gentry. In 1949, it was refounded as one of the state universities of Japan. It currently has more than 10,000 enrolled students (undergraduate and graduate) at nine faculties. It is located at the western tip of Honshu in the cities of Yamaguchi and Ube. Surrounded by splendid nature, this region has a long tradition of international relations both with Asia and Europe: well-known are the pottery craftsmen from Korea, who developed the famous Hagi pottery, the missionary Xavier from Spain, who brought the first tidings from the Western world, and the Choshu-Five, five brave young men, who broke the ban on foreign travel in the mid-19th century to study at London University. Today, the ultra-modern Yamaguchi Center for Arts and Media (YCAM) attracts young artists from all over the world. Present-day Yamaguchi offers many opportunities for enjoying both nature and modern or traditional culture.
