

## 主な研究課題・発表代表論文

耳鼻咽喉科学講座 Otolaryngology

研究領域 上皮情報解析医科学

教授 山下 裕司 Hiroshi Yamashita

Web ページ : <http://ds.cc.yamaguchi-u.ac.jp/~ent/index.html>

## 主な研究課題

- ・内耳におけるアイチエイジング研究
- ・糖尿病による難聴の原因と予防の研究
- ・新しいめまい診断機器の開発と臨床応用
- ・ゼブラフィッシュを用いた難聴遺伝子の機能解析
- ・ゼブラフィッシュを用いためまい疾患予防法の開発

## 発表代表論文

- 1) Kobayashi Y, Sugahara K, Takemoto Y, Tsuda J, Hirose Y, Hashimoto M, Yamashita H. Protective effect of astaxanthin nanoemulsion on mammalian inner ear hair cells. *PeerJ* 2023 Sep 8;11:e15562.
- 2) Matsuura T, Sugahara K, Yamamoto Y, Tsuda J, Hashimoto M, Yamashita H. Prevention of progressive hearing loss in a mouse model of diabetes by oral intake of eicosapentaenoic acid ethyl ester. *Acta Oto-Laryngologica*.2023; 143:113-120.
- 3) Tsuda J, Sugahara K, Yamashita H. Glycative stress and the inner ear disorder. *Glycative stress research* 2020; 7:240-247.
- 4) Tarumoto S, Sugahara K, Hashimoto M, et al. Effect of preservation on the physical and chemical properties of the temporal fascia. *Auris Nasus Larynx* 2020; 47:377-382.
- 5) Hori T, Sugahara K, Tsuda J, et al. Oral administration of an herbal medicine to prevent progressive hearing loss in a mouse model of diabetes. *Auris Nasus Larynx* 2019; 46:703-708.
- 6) Takemoto Y, Hirose Y, Sugahara K, et al. Protective effect of an astaxanthin nanoemulsion against neomycin-induced hair-cell damage in zebrafish. *Auris Nasus Larynx* 2018; 45:20-25.
- 7) Nagato S, Sugahara K, Hirose Y, et al. Oral administration of geranylgeranylacetone to protect vestibular hair cells. *Auris Nasus Larynx* 2018; 45:412-416.
- 8) Fujii H, Hashimoto M, Sugahara K, et al. Quantitative Analysis of Smooth Pursuit Eye Movement Using Video- Oculography. *Archives of Otolaryngology and Rhinology* 2018:030-034.
- 9) Tsuda J, Sugahara K, Hori T, et al. A study of hearing function and histopathologic changes in the cochlea of the type 2 diabetes model Tsumura Suzuki obese diabetes mouse. *Acta Otolaryngol* 2016; 136:1097-1106.
- 10) Hirose Y, Sugahara K, Kanagawa E, et al. Quercetin protects against hair cell loss in the

zebrafish lateral line and guinea pig cochlea. *Hear Res* 2016; 342:80-85.
